Application Form.....	12
Curriculum Vitae: Educational Background	14
Curriculum Vitae: Employment Record.....	15

Years Required for Graduation: Master's course 2 years

Types of Degree

The "Master's degree (Oral Science)" shall be common to all four courses, with a clear focus on oral health sciences.

Requirements for Completion

Students must be enrolled for at least two years and earn at least 30 credits.

Students must earn a minimum of 8 credits in the Required core curriculum, 18 credits in courses within each course (including 14 credits in master's research), and 4 credits in course surgery, for a total of 30 credits or more.

Please consult with your academic advisor regarding course selection.

Credits are awarded by examinations or reports.

In addition to enrollment for at least two years and the acquisition of the required credits, a master's thesis based on original research must be submitted. Upon successful completion of the thesis review, students are awarded a master's degree (Oral Science).

However, students with outstanding research achievements may complete the program in one year.

Field of Course, Research Area and Supervisor

Please contact the supervisor in your chosen research area before sending the admission documents.

Kyushu University Academic Staff Educational and Research Activities Database

(https://hyoka.ofc.kyushu-u.ac.jp/search/index_e.html)

Field of Course	Research Area	Supervisor
Advanced Medical Specialist Training Course (高度専門医療人養成コース)	Pediatric Dentistry and Special Need Dentistry	Prof. Fukumoto Satoshi
	Orthodontics and Dentofacial Orthopedics	Prof. Takahashi Ichiro
	Endodontology and Operative Dentistry	Prof. Maeda Hidefumi
	Periodontology	Prof. Nishimura Fusanori
	Fixed Prosthodontics	Prof. Ayukawa Yasunori
	Implant and Rehabilitative Dentistry	Prof. Ayukawa Yasunori
	Oral and Maxillofacial Radiology	Prof. Yoshiura Kazunori
	Oral and Maxillofacial Surgery	Prof. Moriyama Masafumi
	Oral and Maxillofacial Oncology	Prof. Kawano Shintaro
	Dental Anesthesiology	Prof. Yokoyama Takeshi
	Geriatric Dentistry and Perioperative Medicine	Prof. Kashiwazaki Haruhiko
General Dentistry	Prof. Wada Naohisa	
Medical Administration and Educational Institution Leadership Training Course (医療行政・教育機関指導者養成コース)	Preventive and Dental Public Health Dentistry	Prof. Takeshita Toru
	Dental Education	Prof. Tsukiyama Yoshihiro
Medical Technology Developer Training Course (医療技術開発者養成コース)	Biomaterials	Prof. Ishikawa Kunio
Basic Medical Researcher Training Course (基礎医学研究者養成コース)	Molecular Cell Biology and Oral Anatomy	Prof. Yamaza Takayoshi
	Molecular and Cellular Biochemistry	Prof. Jimi Eijiro
	Oral Neuroscience	Prof. Shigemura Noriatsu
	Aging Science and Pharmacology	Prof. Kanematsu Takashi
	Oral Pathology	Prof. Kiyoshima Tamotsu
	Oral, Brain and Total Health Science	Prof. Jimi Eijiro

Research Subjects

Research Area	
Molecular Cell Biology and Oral Anatomy	<ul style="list-style-type: none"> • Orofacial stem cell-based medicine for tissue/organ regeneration • Molecular regulation of proliferation, differentiation, and senescence in orofacial stem cells • Orofacial stem cell-based pathology for human diseases • Functions of neural crest-derived stem cells in organ development • Molecular mechanism of bone metabolism
Molecular and Cellular Biochemistry	<ul style="list-style-type: none"> • The common molecular mechanisms that control postmenopausal osteoporosis and weight gain and development of therapeutic strategies • The regulatory mechanism of bone metabolism • The molecular mechanism of bone invasion by oral cancer
Aging Science and Pharmacology	<ul style="list-style-type: none"> • Studies on type 3 Diabetes and Alzheimer's Disease • Impacts of chronic systemic inflammation on the brain functions (especially focus on microglia) • Pathophysiological roles of cathepsins in inflammation
Oral Neuroscience	<ul style="list-style-type: none"> • Understanding of molecular mechanisms of taste signaling associated with various diseases (e.g. taste disorders, metabolic syndromes) and development of therapeutic methods for the diseases • Taste organ regeneration and functional analysis of taste related molecules by using new 3 dimensional organ culture system (organoid) • Analysis of taste signaling serving for different functions in multiple organs • Analysis of regulation of food intake and energy homeostasis via taste signaling in oral-brain-gut axis
Oral, Brain and Total Health Science	<ul style="list-style-type: none"> • Studies on predisposition to non-communicable diseases regulated by environmental factors and epigenomic memory • Studies on molecular basis of biological defense system regulation mediated by protease reaction • Studies on the sex differences in energy metabolism and cognitive function
Preventive and Public Health Dentistry	<ul style="list-style-type: none"> • Molecular epidemiology on relationship between oral microbiome and oral and systemic health • Epidemiology on relationship between oral and systemic health • Clinical study of relationship between oral function and systemic health • Development of preventive measures of oral diseases utilizing molecular biology

<p>Pediatric Dentistry and Special Need Dentistry</p>	<ul style="list-style-type: none"> • Translational research of applying primary tooth to regenerative medicine • Study of the energy metabolism on craniofacial growth and development • Molecular analysis of mitochondrial function during dento-craniofacial morphogenesis and development • Genetic analysis of congenital anomaly of craniofacial complex in children and special need children
<p>Orthodontics and Dentofacial Orthopedics</p>	<ul style="list-style-type: none"> • Analysis for the molecular mechanisms through epithelial-mesenchymal interaction • Molecular mechanism of the mechanical stress response during chondrogenesis and osteogenesis • Molecular and developmental biological analysis of the craniofacial region • Finite element analysis and biomechanics relating to clinical orthodontics • An approach to evaluate the physiological and biochemical properties of stomatognathic function • Improvement of Quality of Life through orthodontic treatment for patient with malocclusion
<p>Biomaterials</p>	<ul style="list-style-type: none"> • Fabrication of carbonate apatite bone replacement • Development of three-dimensional interconnected bone replacement • Development of osteoconductive polymer • Development of high performance apatite cement • Analysis of the mechanism of osteoconductivity
<p>Endodontology and Operative Dentistry</p>	<ul style="list-style-type: none"> • Studies on identification of factors and scaffolds indispensable for periodontal ligament tissue regeneration • Studies on the induction of periodontal ligament stem cells derived from iPS cells • Developmental research on 'Bio-Implant' which includes the engineered periodontal ligament tissue • Development of novel pulp capping materials • Studies on the aging of dental pulp cells • Development of bactericidal treatment for caries microorganisms using bacteriophage
<p>Periodontology</p>	<ul style="list-style-type: none"> • Studies on the development of new assessment and diagnostic tool for periodontal diseases • Studies on etiology and bio-regulatory mechanisms of periodontal disease • Studies on biological periodontal tissue regeneration • Basic and clinical studies on the interaction between periodontal disease and systemic disease • Studies on the mechanism of development of low-grade inflammation caused by periodontal disease, and its influence on other tissues

	<ul style="list-style-type: none"> • Studies on the pathogenesis of unique periodontal disease such as drug-induced gingival overgrowth • Studies on the elucidation of patho-physiology of pulpitis and establishment of novel molecular targeted therapy
Fixed Prosthodontics	<ul style="list-style-type: none"> • Studies on esthetic prosthesis • Clinical and physiological study on maxillofacial rehabilitation • Longitudinal study of oral functions and prosthetic interventions • Evaluation and management of oral dryness and oral hygiene • Analytical study on treatment planning for prosthetic interventions • Clinical research for bone regeneration • Mechanobiology of dental implant and prosthodontics • Basic study on cellular responses to surface modification of dental implants
Implant and Rehabilitative Dentistry	<ul style="list-style-type: none"> • Development of biomaterials for prosthodontic treatment • Mechanobiology of dental implant and prosthodontics • Studies on bone regeneration therapy • Development of evaluation system for stomatognathic function • Epidemiological and physiological study on oral rehabilitation using removable dentures • Epidemiological and biomechanical study on oral rehabilitation using implants • Application of digital dentistry and workflow across prosthodontic treatment • Studies on physical effect of mouthguard for exercise • Development and evaluation of treatments in Medication-Related OsteoNecrosis of the Jaw • Studies for optimisation of the surgical and prosthodontic skills affecting short / long term success for implant treatment
Oral Pathology	<ul style="list-style-type: none"> • Molecular and genetic investigation on the development and regeneration of the tooth and periodontal tissues for regenerative therapy • Cellular and molecular biology of oral cancer • Investigation of a common mechanism of developmental formation and tumor formation
Oral and Maxillofacial Radiology	<ul style="list-style-type: none"> • Study on quantitative diagnosis • Computer-assisted diagnosis using dental images • Studies on direct digital introral imaging system • Analysis on patient radiation dose in dental radiography • Diagnostic image analysis for oral cancer • Image analysis on oral cancers • Studies on radiotherapy for oral cancers • Radiological analysis of cervical lymph node metastasis of malignant tumors • Image analysis on the structure and pathology of salivary glands • Application of ultrasonography to dentistry

	<ul style="list-style-type: none"> • Image analysis on the structure and pathology of the masticatory muscles and related structures • Application of “interventional radiology” to dentistry • Development of the training system for dental radiography using virtual reality technique
Oral and Maxillofacial Surgery	<ul style="list-style-type: none"> • Accurate 3 dimensional measurement on cleft lip and palate / jaw deformity • Development of surgical simulation / navigation system • A study on bone regeneration and compatible biomaterials • Development of artificial temporo-mandibular joint • Development of new treatment method in cleft lip and palate • Development and evaluation of treatments in jaw deformity • Molecularly targeted therapy for oral cancer • A study on the mechanism of invasion and metastasis of oral cancer • Molecular mechanisms of salivary gland development and regeneration • Immunological studies on the pathogenesis of oral mucosal diseases • Immunological studies on the pathogenesis of Sjögren's syndrome • Experimental study on bone regeneration in jaw • A study on regulatory mechanisms of bone immunology
Oral and Maxillofacial Oncology	<ul style="list-style-type: none"> • Development of the novel treatment for oral cancer • Studies on morphological and functional reconstruction after the surgery of oral cancer • Studies on host defense mechanism against oral cancer • Studies on the oncogenes of oral cancer • Studies on the mechanism of invasion and metastasis of oral cancer • Studies on the mechanism of the escape from immune surveillance by tumor-associated macrophages of oral cancer • Studies on relationship between oral bacterial flora and treatment of oral cancer • Studies on dysphagia after treatment of oral cancer (evaluation and rehabilitation) • An immunological study on the pathogenesis of oral mucosal diseases • Analysis of the cell differentiation and intracellular transduction of oral epithelial cells • Immunological studies on the pathogenesis of Sjögren's syndrome • Immunological studies on the pathogenesis of IgG4-related disease • Studies on expanded T and B cells for IgG4-RD and other human autoimmune disease -Joint International Research- • Studies on the treatment of odontogenic tumors • Biological and cytological studies of odontogenic tumors • Studies on the orthognathic surgery for jaw deformities

	<ul style="list-style-type: none"> • Clinical studies on the preventive treatment of anti-resorptive agents related osteonecrosis of the jaw • Studies on the pathogenesis and treatment of cleft lip and or palate • Clinical studies on the relationship between chronic orofacial pain and psychosocial factors
Dental Anesthesiology	<ul style="list-style-type: none"> • Studies on nutrition and metabolism during perioperative period • Studies on life support for dental emergency • Studies on clinical pharmacokinetics of aspirin • Studies on electroencephalogram during general anesthesia • Studies on electrocardiogram during perioperative period • Studies on the management of tracheal tube during general anesthesia • Studies on microcirculation during general anesthesia • Study of the effect of inspiratory oxygen concentration during general anesthesia after emergency • Study on hemolysis by extracorporeal circulation • Study on the standard values of preoperative screening tests in children • Study of AR-based materials on the educational effects
Geriatric Dentistry and Perioperative Medicine in Dentistry	<ul style="list-style-type: none"> • Studies on the relationship among oral function, systemic disease, and nutrition • Studies on oral management of patients with systemic disease • Studies on oral function management for long healthy lives • Studies on the development of regenerative dental medicine for super-aged society • Studies on oral health care for multidisciplinary collaboration in disasters
Dental Education	<ul style="list-style-type: none"> • Development of instructional strategies to encourage students to transform themselves into lifelong active learners • Development of systematic outcome-based educational programs • Development of ICT-based learning support systems and effective learning materials • Development of reliable tools to assess students' learning outcomes
General Dentistry	<ul style="list-style-type: none"> • Studies on oral tissue regeneration using stem cell populations and/or stem cell-inducing factors • Studies on oral care for the perioperative patients • Studies on the improvement of oral function for ADL elevation of the aged. • Studies on etiology and bacteria of periodontal disease • Development of novel training programs and evaluation systems for dental trainees • Research on mental health status of dental trainees

Guidelines for Prospective Applicants to the International Master's Program in Graduate School of Oral Science

Admission

International students who wish to enroll in the master's program from April 2024 may apply for special selection if they meet the following requirements

1. Required Qualifications

Hold foreign nationality and meet the following requirements:

- (1) Those who have graduated from a university or expect to graduate in March 2024.
- (2) Those who have received or expect to receive (by March 31, 2024) a bachelor's degree regulated by the prescription of Paragraph 7, Article 104 of the School Education Law.
- (3) Those who have completed or will complete sixteen years of verifiable school education in a foreign country by March 31, 2024.
- (4) Those who have completed or expect to complete 16 years of education by March 31, 2024 by studying the relevant subject/s in Japan through a correspondence course provided by the school abroad.
- (5) Those who have completed a 16 year course at an overseas educational institution as required by the Japanese Minister of Education, Culture, Sports, Science, and Technology (hereinafter referred to as "MEXT"), or be expected to do so by the end of March 31, 2024.
- (6) Those who have already had or expect to have a degree corresponding to that of a bachelor's through the completion of courses with a term of study for three years or more by March 31st, 2024 (which includes the completion of an equivalent degree taken through a correspondence course in Japan provided by a foreign university, and also includes the completion of an equivalent degree issued by an educational institute which is designated as equivalent to those in Japan based on the conditions stated above and is acknowledged as a part of the formal education in the applicant's home country) at a foreign university or another overseas educational institute (limited to those appropriately rated by an accreditation agent of the government of the applicant's home country or by another officially approved accreditation institute, or specifically and independently designated as equivalent by MEXT).
- (7) Those who have completed or are expected to complete the specialized course at a technical school (limited to those whose course term is over 4 years and who meet other criteria established by MEXT) recognized by MEXT after the date designated by MEXT.
- (8) Those designated by the Minister of Education, Culture, Sports, Science and Technology (see Notification No. 5 of the Ministry of Education, Culture, Sports, Science and Technology, 1953).
- (9) Those who have been admitted to a graduate school pursuant to the provisions of Article 102, Paragraph 2 of the School Education Law, and have been recognized by the graduate school of this university as having the academic ability suitable for receiving an education in the graduate school of this university.
- (10) A person who has been enrolled in a university for 3 years or more or completed 15 years of formal education in a foreign country by March 31, 2024, and has been recognized by this graduate school as having earned the prescribed credits with excellent grades.
- (11) Those who are recognized by the school as having academic ability equivalent or superior to that of a university graduate and have reached 22 years of age through individual screening of application qualifications.

2. Application Period

Third Admission: February 13 (Tuesday) - 15 (Thursday), 2024

3. Application Documents

- i. Application form (Kyushu University format)
*Attach two photos (5 x 4cm) to your application form
- ii. Curriculum Vitae
- iii. College diploma and college transcript from the last school you graduated from
- iv. Entrance examination fee: 30,000 JPY

Please transfer in Japanese yen and cover all the commission costs when you transfer.

(Not required for Japanese government scholarship (MEXT) students)

N.B. This fee is non-refundable

Applicants are asked to either ① make a bank transfer (make sure to enclose a photocopy of the remittance receipt together with their application documents as proof of payment) or ② pay the application fee online via “e-payment.” Payment of all bank charges, including any transaction charges, is entirely the responsibility of the applicant.

<①Bank Transfer>

Beneficiary:

Name	Kyushu University
Address	744 Motooka, Nishi-ku, Fukuoka 819-0395
Country	JAPAN

Beneficiary's Bank:

Name	SUMITOMO MITSUI BANKING CORPORATION
Branch Name	FUKUOKA BRANCH
Address	1-1-1 Hakataekimae, Hakata-ku, Fukuoka 812-0011, JAPAN
A/C No.	7119240
Swift Code	SMBCJPJT

<②Credit Card Payment>

Payment can be made by credit card online at;

<https://e-shiharai.net/> (in Japanese) <https://e-shiharai.net/english/> (in English)

*For detailed information on how to pay all fees online, please see the page labeled “How to Pay Your Application Fee by Credit Card” at the end of this brochure.

- v. Submission of original TOEIC, TOEFL, or IELTS score reports

(for applicants seeking exemption from the written English examination).

If your English language ability is assessed as sufficient, based on your submitted TOEIC, TOEFL, or IELTS score report, you will be exempt from taking the written English examination.

However, if an original score sheet is not submitted, you will be required to take the written English examination. Please submit an original score reports dated within two years of the master's degree application deadline.

The original score report will be returned to you after processing.

【Original score sheet】

- Official Score Certificate of TOEIC
- Test Taker Score Report or Institutional Score Report of TOEFL
(Score Record of TOEFL-ITP is also accepted)
- Test Report Form of IELTS

4. Selection Method

Selection will be based on the results of examination, interview and application documents.

Written examination and interview

Place: Faculty of Dental Science, Kyushu University

Third Admission: Date: February 20 (Tuesday), 2024

Time (JST)	Subject
9:30~10:30	Field of Specialty*
10:50~12:20	English
13:30~	Interview

*You will be examined on your field of specialty and related subjects.

*In general, entrance examination and interview for examinees residing overseas are conducted online using Zoom. Please contact us for details.

5. Notification of Results

Applicants will be notified by email.

Third Admission: March 6 (Wednesday), 2024

6. Enrollment Procedure

The enrollment forms will be sent separately. These documents must be submitted during the admission procedure period, which will be notified at a later date.

*If you do not complete the enrollment procedure during this period, you will lose your place.

Entrance fee and tuition fees

Entrance fee: 282,000 yen

Tuition fees: 267,900 yen for the spring semester (April 1, 2024 - September 30, 2024) (Annual amount 535,800 yen)

*All fees are waived for Japanese government scholarship (MEXT) students.

*All fees shown here are subject to change.

7. Use of Personal Information

- i. Your personal information is only used for the application process, admission procedure and data collection.
- ii. Your personal information is protected under Japanese Personal Information Protection

8. Applicants with Disabilities

The University provides consultation for applicants with disabilities who may require special arrangements during the entrance examinations or in classes after enrollment.

Please contact the following office prior to the application process as soon as possible as it sometimes takes extra time to decide on the arrangements depending on the situation.
